

Bennington County Regional Commission

The Bennington County Regional Commission (BCRC) works with and on behalf of its member municipalities to build strong, resilient, and sustainable communities, to foster economic prosperity, and to promote a high quality of life for residents of the region. The BCRC plays an important role in coordinating work among local governments, state and federal agencies, regional public and nonprofit organizations, educational institutions, and private interests. The organization is governed by local appointees from seventeen area municipalities and commissioners who represent interests ranging from public health to economic development. Regular meetings are held on the third Thursday of every other month, with frequent special meetings throughout the year (information at: www.bcrct.org).

In addition to its ongoing role in supporting the comprehensive planning work of municipal officials, the BCRC is a regional center for programs in community and economic development, transportation, energy, environmental conservation, water quality, public health, solid waste management, and emergency management. BCRC staff is available to provide direct assistance in these areas and to serve as a liaison with state and federal agencies.

During the past year, the BCRC has worked to implement its comprehensive plan through a variety of programs and cooperative work with member municipalities. Economic development planning at the BCRC is conducted by dedicated staff and supported by a committee with representatives appointed by the regional development corporation. The goal of this BCRC program is to support business retention, growth, and recruitment. Related BCRC planning and community development initiatives support redevelopment initiatives in downtowns and village centers, grant assistance for local businesses, and have produced reuse planning studies for key properties such as the former SVC campus, the recently idled Energizer complex and the Bennington Armory. Concern over the state's water quality has led the BCRC to identify and implement local projects that not only reduce stormwater runoff, but also protect roads, bridges, culverts, and private property from damage. Other important activities have included: an assessment of land use regulations affecting housing in each town and village, expanded staff capacity to assist with implementation of local energy plans, village center and neighborhood development area designations, implementation of the regional solid waste management plan, and planning for roadway, bicycle and pedestrian, and public transportation improvements.

In the coming year, the BCRC will continue to provide information and resources to assist business and local governments and to take advantage of opportunities created through the federal American Rescue Plan and other programs. We expect to see continued focus on infrastructure (including broadband) improvement projects, pandemic recovery and business support services, planning for workforce housing, and measures to support implementation of the Vermont Climate Action Plan.

While our downtown Bennington offices, located at 210 South Street, have reopened, staff still work remotely at times, so it generally is easiest to contact us via email (see contacts at www.bcrct.org). Fortunately, technology has allowed us to continue work with little interruption in progress on any projects.

Respectfully submitted,
Bill Colvin, Director
